

## Intelligence Driven Solution for School Threat Assessment Teams

At FivePoint Solutions, we are helping states protect their schools by putting real time, actionable intelligence into the hands of key personnel. The FivePoint School Safety Solution is a fully configurable, web-based search platform that enables school resource officers, school officials, and threat assessment teams to make more informed decisions in the field using real time information.

The FivePoint School Safety Solution encompasses an online search portal and case management software that allows threat assessment teams to query critical data aggregated from several key sources as well as manage threat assessment processes in an effort to keep students safe.

### DASHBOARD

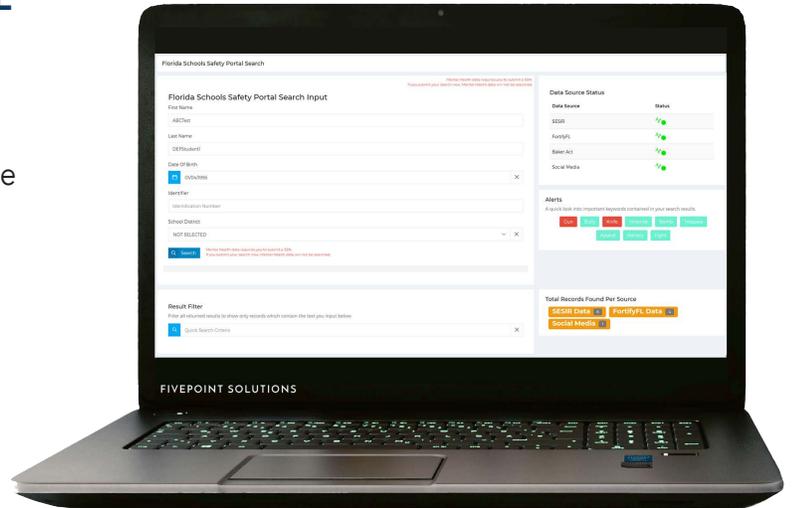

- School Incident Reporting
- Suspicious Activity Reporting
- Social Media Monitoring
- Mental Health Assessment Data
- Court System Databases
- Law Enforcement Databases
- State Motor Vehicle Databases
- Federal, State and Local Warrant Databases

## PURPOSE OF THE FIVEPOINT SCHOOL SAFETY SOLUTION

The FivePoint School Safety Solution is a mission critical resource that promotes information sharing between designated teams inside and outside of the school environment:

- School and college resource officers
- Local law enforcement
- School principals
- School and college counselors
- Medical professionals
- Mental health professionals
